

Features

- 4 sets of scissors to achieve good balancing
- Industrial belt pulling system for reliability and durability
- Neat and easy cable management by running cable along the scissors.

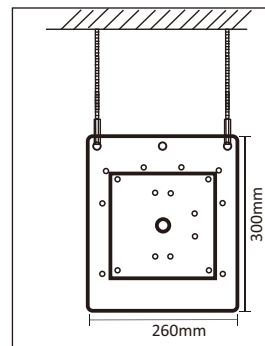

Remaco FLY Series is designed to raise and lower projection screen from high ceiling. It eliminates the need for excessive extra top drop on projection screen. It can also lower the screen for maintenance purpose.

There are two models, FLY-3030 with maximum drop height of 3m and FLY-3050 with maximum drop height of 5m. FLY is suitable for use with Remaco PRO-L Series and XXL Series screens.
