

**Features**

- Offers high resistance against impact damage and burnishing
- Can be used the area of coating for the plastic substrates used as projection screen with backing material such as polyester, plaster board, fiberglass, polycarbonate etc
- It allows to transform any smooth paintable surface into a high performance projection screen
- Quick dry
- Good mechanical abrasion resistance
- Resistance to household chemicals and alcohols
- Good blocking resistance

| Part Number | Gain | Viewing Angle (Degree) | Thickness (MM) |
|-------------|------|------------------------|----------------|
| OPW-GA1.0   | 1.0  | 160                    | 0.15           |
| OPG-GA0.8   | 0.8  | 130                    | 0.15           |
| OPS-GA2.4   | 2.4  | 90                     | 0.15           |
