Projector Lift Series

PLT - 415

Remaco PLT-415 is a projector lift for keeping projector in the false ceiling. When in operation, the lift will be lowered to your desired position. After using, the lift will be raised to keep the projector out of sight into the false ceiling creating a neat working environment.

The lift is controlled by the provided MPC-851 Motor Power Controller. With MPC-851, the lift can be controlled by RF remote via AVA-316 15 Channel RF remote controller and also by a provided AVA-200 wall switch. Third party control system such as AMX or Crestron can also be used to control the lift through our MPC-851 by providing a dry contact closure.

The multi-ways of control allows Remaco lift to be very flexible and user friendly.

SPECIFICATIONS

Dimension	:	508mm x 508mm
Weight	:	20kg
Maximum Load Capacity	:	25kg
Ceiling Opening	:	545mm x 545mm
Power Consumption	:	185watts
Voltage	:	230VAC
Travel Distance	:	Upto 2100mm
Total Height (Kept Position)	:	365mm to 565mm
Total Height (Fully Extended)	:	2325mm to 2525mm
Colour	:	White
