

# Office Communication in a Box

## SL1000 – Benefits

SL1000 is an intelligent cost-effective telecommunication system that is equipped with capability to adapt functions for immediate and emerging business needs.

### AFFORDABILITY

#### Handy and Useful Functions

SL1000 is equipped with rich Built-in functions that improve the employees' communication environment, contributing to saving in Total Cost of Ownership.

#### Hybrid Concept

SL1000 provides Hybrid ports, realizing seamless integration of multiline terminals, single line telephones, facsimiles, and more without complex settings.

#### Scalable Architecture

SL1000 starts from 4 trunk lines and 8 extensions, scales up to 128 extensions (230 ports). The system is flexible to suit any changing demands of communication infrastructure.

### EFFICIENCY

#### Productive Communication

Increase efficiency by fully utilizing system features such as Conference, Automated Attendant, Call Forwarding and more, for a productive office communication environment.

#### Web-based Manager

The terminal and system settings are easily customized to suit the user's preference.

#### Unique Features

Office / Home Guard functions are provided. Also, the Mobile Extension feature provides "Mobility".

### IP Telephony

#### IP-Enabled

SL1000 is ready with the capability of VoIP (Voice over IP) trend, or for possible change in the future for both H.323 and standard SIP (Session Initiation Protocol) trunks and extensions.

#### Feature Rich IP Terminal

SL1000 provides 24-key IP terminal, having the same usage as a multiline terminal in the office IP environment. And this IP terminal can be located out of office as a Remote Extension.

### ECOLOGY

#### Lower Power Consumption

SL1000 uses less power consumption than most legacy systems. It is approximately 25%\* lower than previous models, and reduces the total cost of ownership by minimizing the office electricity expense, at the same time saving the environment by going green.

\* Comparison with our conventional model.

#### Power Saving Mode

SL1000 allows automatic standby mode during office closing hours. This feature saves the system's energy when it is not in use, and increases its overall performance.

## SL1000 – Built-in Features

SL1000 delivers plenty of built-in features for your needs.

### 1. Built-in Voice Messaging

Increase productivity of handling incoming calls by Built-in Auto-Answering function. SL1000 is initially built-in with an Auto-Answering feature without additional hardware, and is able to record up to 4 greeting messages by the users. It also keeps up to 10 messages to be recorded from outside.

### 2. Caller-ID

Identify who has been contacting your office by Caller-ID feature. SL1000 can interface the Caller-ID trunk from Telco, and the information can be displayed on all types of terminals. In addition, incoming ring tone can be set against specified Caller-ID numbers, allowing identification by ring tone.

### 3. Group Listening

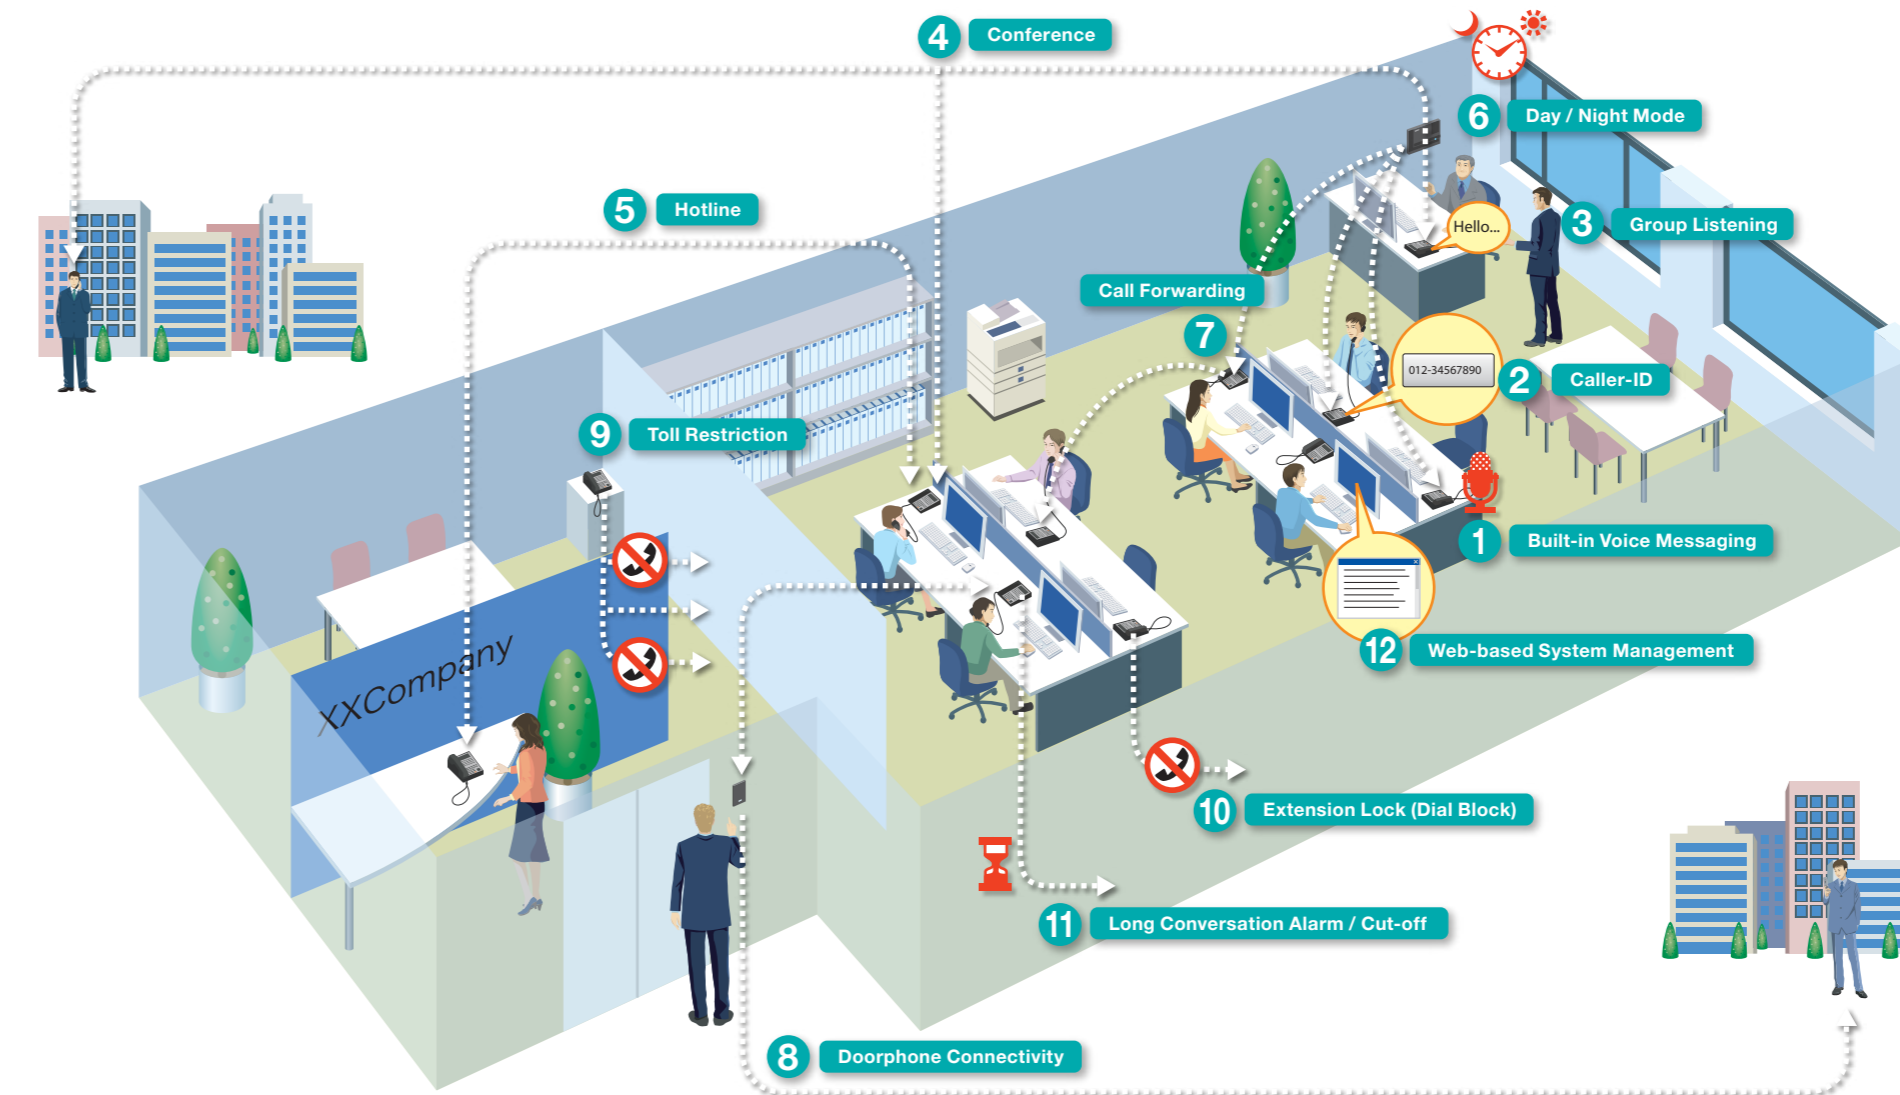

Group Listening function allows you to broadcast your conversations via built-in speaker on the multiline terminal. This enables your surrounding parties to listen to the conversation.

### 4. Conference \*Optional item required

Join a conference without even leaving the desk. This feature allows you to set up a teleconference between internal and/or external parties. (maximum 16 participants per group, total 32 participants simultaneously) Remote Conference is also available where internal and/or external parties can access to virtual conference room with password.

### 5. Hotline

Ideal feature for reception, security guard houses, parking attendants, and etc. Set up the terminal for dedicated use. This function allows you to call a pre-assigned extension or external number by just lifting the handset without dialing any numbers.

### 6. Day / Night Mode

Employers can control Day/Night mode for incoming calls after working hours and at the same time control outgoing calls after working hours. SL1000 provides up to 8 system modes which can be switched either automatically or manually. Each mode can be configured to redirect all calls towards specified extensions or groups that match your requirements effectively.

### 7. Call Forwarding

No more hassle for the customers to be reaching an employee who's not at their desk. Call Forwarding feature enables incoming calls to be redirected automatically to another extension or an external number (mobile phone, home and etc.).

### 8. Doorphone Connectivity

SL1000 provides proprietary doorphone terminal connections at the front door. Additionally, if nobody is in the office, then there is an option that the doorphone ring can be forwarded to your mobile/home.

### 9. Toll Restriction

Toll Restriction feature prohibits specified extensions from accessing unauthorized numbers which have been pre-programmed into the restriction table. A total of 15 restriction classes can be assigned to each extension.

### 10. Extension Lock (Dial Block)

Extension Lock (Dial Block) feature prevents unauthorized personnel from making calls from your extension while you are away from your desk. Feature can be switched on or off by entering a security code.

### 11. Long Conversation Alarm / Cut-off

Manage the length of the conversation to cut down communication cost and increase efficiency of employees. This alarm feature provides callers a beeping tone periodically to remind them. The cut-off feature can be used to disconnect external calls forcefully after the pre-programmed time limit.

### 12. Web-based System Management

Administration of the system has never been easier with the intuitive Graphical User Interface (GUI). Your own PC can be connected to SL1000 to let you edit/change/manage various terminal settings.
